

AirCoin Project Whitepaper

1. Introduction

AirCoin is a commemorative ERC-20 token deployed on the Ethereum blockchain. It is designed to encourage long-term holding and discourage speculative trading.

2. Tokenomics

Total Supply: 1,000,000,000,000 (1 trillion)

Burn Mechanism: 5% of each transfer is automatically burned.

Remaining 95% is transferred normally.

3. Purpose and Vision

AirCoin is not intended for speculation or frequent trading. It serves as a symbol of community and commitment to decentralized ideals.

4. Distribution Schedule

100% of the total supply was minted at deployment. 99% has been transferred to the founder's wallet, while 1% remains at the deployment address for transaction fees and public burn events.
